Welcome to Jefferson Lab

Details...

- **Badges**
 - * Swipe your badge prior to entering & exiting the building
 - * Turn your badge in at the front desk before leaving the last day
- > Please turn pagers & cell phones to silent mode
- Computers available in L104
- ➤ Tour meet at 4pm in front of CEBAF Center
- ➤ The agenda is packed, please help us stay on schedule

Food...

- > Coffee breaks in the Atrium
- > Lunch on your own
 - Cafeteria right outside this room
 - * Many places nearby list in your folder
- ➤ Dinner Wednesday 6:30 in the Atrium Diane has tickets

Jefferson Lab Status Report

Karen S. White

Our EPICS System

- > > 80 HP-UX Workstations
- > > 140 IOCs Motorola 167/177, PowerPC 2700
- > ~300 Device Control Applications (VME, CAMAC, GPIB, Serial, Custom)
- > ~1350 Instantiations Across IOCs
- **▶** Over 250K EPICS Records for ~65K Control Points
- Over 2000 User Interface, System and High Level Applications
- > 11 Independently Functioning Control System Segments across the site

Ongoing Work

- > Control System Maintenance
- **▶** Machine Reconfiguration
- > Support for New Experiments
- Reducing load on IOCs
- Adding Capacity
 - * More Memory & Disks
 - * 68K => PowerPCs
 - * Improving Network

Recent Additions

- > CA Gateway
- > CA Nameserver
- > Sun Servers for:
 - * Oracle Database
 - * Archiver
 - * Backups

Projects

- ➤ New Archiving System (Chris Larrieu)
- > PIOC (Joan Sage)
- ➤ Generic Lock Framework (Brian Bevins)
- **▶** Oracle Database
 - * Model Server, Archiver, OPS-PR, Time Accounting, E-Log (Theo Larrieu)
- ➤ Expanding our toolset QT, Java, CORBA (Chris Larrieu, Chris Slominski)
- > New environment for Unix applications

Long Term Challenges

- ➤ Increasing support for more OS types
- ➤ Need to decide on Unix & IOC platforms for the future lots of choices (Arne Freyberger)
- > Expand use of Oracle to include management of device control issues
- > Planning for JLAB 12 GeV Upgrade
