

## APS Laser Safety Committee Meeting June 13<sup>th</sup> 2005 1:00 PM, Room B4300

### Present:

Yuelin Li  
David Gosztola  
Dale Brewe  
Jim Lang  
Reinhard Pahl  
Bruce Murdoch  
Ralph Hinterman  
Jeff Alicz  
Eric Landahl  
David Gore  
Bruce Glagola  
Elroy Chang  
Will Brocker  
John Houck

### Minutes

The APS Laser Safety Committee meeting was held at the request of Bruce Murdoch (ANL-LSO) to develop a program for on the job training (OJT) for laser alignments (class 3b & 4). Bruce Murdoch provided 4 handouts as examples of laser safety training. It was decided that a one page checklist would be the appropriate method to fulfill the DOE request for this program. Reinhard Pahl, Yuelin Li, and Elroy have been tasked with developing the initial draft of the checklist.

- The on the job training checklist will initially be reviewed and edited by the APS and Chemistry Divisional Laser Safety Committees and ANL-LSO
- APS Laser Controlled Area Supervisors will have an opportunity to add commentary to the checklist or OJT program

Note: Reinhard Pahl has written an initial draft document for laser alignment training 6-17-05

Note: David Gosztola, chairman of the Chemistry Division Laser Safety Committee continues to participate in APS Laser Safety Committee meetings and add his expertise and commentary.

Reminder: ANL LSO to follow up on: Medical Department laser eye examination database

- Medical department would perform data entry
- Users could view whether a laser user had an eye exam via TMS
- A training course number will assigned
- The system is expected to be available by end of March '05
- Bruce Murdoch to follow up on the status of this program
