

### **Programming the EZ Touch Panel**

1. Connect COM1 of the EZ Touch Screen to the Dell Inspiron 5000e laptop's serial port with an EZ Touch – PGM CBL.
2. Open "EZ Touch Editor".
3. In the "Project Information Window" select "Edit Program Off-line (write to panel later)".
4. Under "project name, click on arrow and select the desired program. Example: If programming RF2's touch screen choose "RF2klystronHMI.ezt".
5. Click on OK.
6. At this point the application touch screen will open.
7. To the far right of the window, click on box "3" – "Write your program to panel".
8. The "Write program to panel" opens.
9. Verify the Ethernet/com port is set to COM2.
10. Click on "Start".
11. The "EZ Touch" windows opens, select "Yes" to transfer user program to Flash.
12. Close "Write Program to panel" window.
13. Close "EZ Touch " program.
14. Disconnect laptop from touch screen.
15. Connect touch screen to PLC.
16. Return laptop, carrying case and associated cables to C3261.
